**Why do I need to take this class?** Certified irrigation technicians  
are the field technicians that help install, maintain and repair  
irrigation systems.

- Cut and join pipe, know the limitations of different piping systems, and understand basic hydraulics.
- Layout and install piping and water delivery components;
- backflow prevention components; mechanical, hydraulic and electrical irrigation controls; and other irrigation system components.
- Troubleshoot and repair irrigation components and systems.

**Becoming a Certified Irrigation Technician allows you to:**

- Add instant credibility with customers.
- Increase job opportunities.
- Demonstrate your commitment to efficient water management
